

Creating a new Pictures to Exe
Show.

First steps

- Create a new folder for the project
- Copy all your images, sounds into the folder
- Images should be about 2000px max, unless you want to create an effect, then aim for 4000px for those particular images.
- Sound files are best as mp3.

Open Pictures to Exe. Select the folder with your files.
Select File->New Project
In the panel that appears select the aspect ratio. The two
main ones are
4:3 for projection or 16:9 (widescreen) for TV or PC.
